

ADVANCED CAMERA AND LIGHTING TECHNOLOGY HELPS SUPER DUTY GET THE WORK DONE

All-new F-Series Super Duty features up to seven cameras and LED lighting technology to aid visibility

7 CAMERAS HELP YOU SEE MORE

- 1 Front grille camera – creates a 180-degree view ahead and around tight corners
- 2 & 3 Sideview cameras – create a view along both sides of the truck
- 4 Forward-facing camera – watches the movement within the lane to deliver information to the lane departure warning system

- 5 Center high-mounted stop lamp camera – provides a view of cargo in the box and aids in fifth-wheel/gooseneck connections
- 6 Tailgate-mounted camera – provides a view behind the truck and aids in conventional trailer connecting
- 7 Customer-placed trailer camera – provides a view behind the trailer to help while backing up

LED LIGHTING

Advanced LED technology sheds light around the all-new Super Duty:

- LED headlamps and taillamps with signature lighting help provide enhanced nighttime visibility
- Powerful, durable, bright LED lights included in back of side mirrors help provide improved lighting around the exterior of the truck long after the sun sets
- LED cargo box lighting helps make it easier to find tools and other items after dark
