

ALL-NEW FORD F-SERIES SUPER DUTY, THE ULTIMATE TOWING MACHINE

The all-new Ford F-Series Super Duty uses advanced materials specially constructed to reduce weight while improving strength, to create a foundation optimized for heavy towing. Combine that with smart towing assistance technology, and Super Duty is our smartest and most capable tow rig ever.

ADVANCED TRAILER TOW TECHNOLOGY

The all-new Super Duty can be equipped with advanced technology to help make maneuvering a trailer easier for even the most experienced drivers who tow:

- Four cameras provide a 360-degree bird's-eye view around the entire truck
- Center high-mounted stop lamp camera provides greater visibility into the cargo box and behind the vehicle
- A sixth, consumer-placed trailer camera can be attached to a trailer to further improve visibility backing up
- Trailer tire pressure monitoring system warns the driver if a trailer tire is losing pressure
- BLIS® (Blind Spot Information System) with trailer tow technology is optimized for Super Duty to warn of traffic in the truck's blind spot, including the length of the trailer

- Trailer reverse guidance provides visual cues and tips to help with backing up a trailer

BEST SUPER DUTY TOWING PERFORMANCE EVER

- Improved fifth-wheel towing
- Improved gooseneck towing
- Improved conventional towing with higher weight-distributing hitch capability
- Improved braking

ALL-NEW SUPER DUTY
